

Liquidity Coverage Ratio Disclosure as on December 31, 2023

In the backdrop of the global financial crisis that started in 2007, the Basel Committee on Banking Supervision (BCBS) proposed certain reforms to strengthen global capital and liquidity regulations with the objective of promoting a more resilient banking sector. In this regard, the Basel III rules text on liquidity – “Basel III: International framework for liquidity risk measurement, standards and monitoring” was issued in December 2010 which presented the details of global regulatory standards on liquidity. Two minimum standards viz. Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR) for funding liquidity were prescribed by the Basel Committee for achieving two separate but complementary objectives.

The LCR promotes short-term resilience of banks to potential liquidity disruptions by ensuring that they have sufficient high quality liquid assets (HQLAs) to survive an acute stress scenario lasting for 30 days.

LCR Compliance as on December 31, 2023

LCR Calculation Methodology	RBI prescribed minimum LCR	Bank's Daily Average LCR during the Quarter ended December 31, 2023
LCR= $\frac{\text{Stock of High Quality Liquid Assets}}{\text{Total net cash outflows over the next 30 calendar days}}$	100%	190.80%

Below mentioned is a position of Liquidity Coverage Ratio computed based on daily simple average for the Quarter ended December 31, 2023

Net Stable Funding Ratio Disclosure as on December 31, 2023

The Net Stable Funding Ratio (NSFR) is one of the Basel Committee's key reforms to promote a more resilient banking sector. The NSFR will require banks to maintain a stable funding profile in relation to the composition of their assets and off-balance sheet activities. A sustainable funding structure is intended to reduce the likelihood that disruptions to a bank's regular sources of funding will erode its liquidity position in a way that would increase the risk of its failure and potentially lead to broader systemic stress. The NSFR limits overreliance on short-term wholesale funding, encourages better assessment of funding risk across all on- and off-balance sheet items, and promotes funding stability.

The Bank is required to maintain the NSFR on an ongoing basis on a standalone Bank level and on a Group level. The minimum NSFR requirement set out in the RBI guideline for the standalone Bank and for Group effective October 1, 2021 is 100%. The Bank does not have any subsidiary as on date.

NSFR Calculation Methodology	RBI prescribed minimum NSFR	Bank's NSFR for the Quarter ended December 31, 2023
NSFR= $\frac{\text{Available amount of Stable funding}}{\text{Required amount of Stable funding}}$	100%	153.79%
