Basel- III guidelines issued by RBI

Reserve Bank of India issued Guidelines based on the Basel III reforms on capital regulation on May 2012, to the extent applicable to Banks operating in India. The Basel III capital regulation has been implemented from April 01, 2013 in India in phases and it will be fully implemented as on March 31, 2018. The Basel III Capital Regulations have been consolidated in Master Circular – Basel III Capital Regulations

Basel III Capital regulations continue to be based on three-mutually reinforcing pillars viz, minimum capital requirements, supervisory review of capital adequacy and market discipline of the Basel II capital adequacy framework. The circular also prescribes the risk weights for the balance sheet assets, non-funded items and other off-balance sheet exposures and the minimum capital funds to be maintained as ratio to the aggregate of the risk weighted assets (RWA) and other exposures, as also, capital requirements in the trading book, on an ongoing basis and operational risk. The Basel-III norms mainly seek to:

- a) Raise the quality of capital to ensure that the Banks are capable to absorb losses on both as going concern and as gone concern basis,
- b) Increase the risk coverage of the capital framework
- c) Introduce leverage ratio to serve as a backstop to the risk-based capital measure
- d) Raise the standards for the supervisory review process and public disclosures etc.

The macro prudential aspects of Basel III are largely enshrined in the capital buffers, viz., capital conservation buffer and countercyclical buffer. Both the buffers are intended to protect the Banking sector from stressed situations and business cycles. The Capital Conservation Buffer requirements would start from March 31, 2016 and are to be fully implemented by March 31, 2019. The Reserve Bank of India has released the Report of the Internal Working Group on Implementation of Countercyclical Capital Buffer (CCCB) in India on July 21, 2014. The CCCB shall increase gradually from 0 to 2.5 per cent of the RWA of the bank but the rate of increase would be different based on the level/position of credit-to-GDP gap between 3 and 15 percentage points.
